

CP06-54-000

To whom it may concern,

As a resident of Long Island I'm concerned about the impact a natural gas terminal will have if it should be placed in the middle of the Long Island Sound. I believe the cost and potential danger to the environment to be too high for consideration. The Long Island Sound is the heart of Long Island's north shore. A gas terminal in the middle of the sound would be an eyesore and a constant distraction to all the people who are attempting to enjoy the waterway. I also do not want my tax dollars used to pay for the 24 hour security this facility would require. The more industrialized and over populated Long Island becomes, the faster people will leave. We currently pay three times the national average in property taxes in Nassau County. What makes this anomaly palatable is the quality of life we enjoy on Long Island. Please lets keep the quality of life inline with the tax dollars we currently pay. I say NO to Broadwater.

Sincerely,

*Ch Yack 11/9/06*
